PROFESSIONAL SUMMARY

Full Stack Engineer with 6+ years of experience designing and developing scalable web and desktop applications using React, Python, Django and FAST API. Strong expertise in REST API design, authentication systems, database optimization, and performance-driven frontend architecture. Experienced in building secure enterprise tools, interactive UI systems, and end-to-end feature ownership from architecture to deployment.

WORK HISTORY

Senior Associate Developer, **Eccentric** Sep 2022 to Feb 2026

- Designed, developed, and deployed a **Key Management System** using Python, Django, Django REST Framework (DRF), PostgreSQL, and Tailwind CSS, enabling secure key generation, expiry tracking, audit history, and live status monitoring.
- Developed **Electron + React desktop apps** with manual and Office-based login, live updates, and Supabase integration.
- Experimented with **Generative AI integrations** using OpenAI APIs to automate content generation and improve internal tooling efficiency.
- Designed RESTful APIs using Django REST Framework with JWT authentication.
- Contributed to CI/CD pipelines using GitHub workflows for automated build and deployment.
- Experience working with SQL-based enterprise databases including PostgreSQL and SQL Server–style relational modeling.
- Integrated Celery or background job handling for key expiry notifications.
- Participated in system architecture discussions and end-to-end feature design across frontend and backend modules.
- Contributed to digital automotive platforms for brands including Jeep, Hyundai, Toyota, Mahindra, Suzuki, Nissan, and MG.
- **Achievements**:
    - Delivered 5+ internal applications, reducing project turnaround time by 30%.
    - Developed and deployed a software update, resulting in a 30% reduction in system errors and improving application performance by 25%
    - Mentored 3+ junior developers, improving team delivery by 20%.
    - Consistently recognized for reliability.

Email Developer, **Trantor Software (Onsite Google)** Gurugram, Haryana - June 2020 to Sep 2022

- Worked on large-scale Google marketing and developer campaigns including Google Pay, YouTube, Google Ads, Google Play, Android Developers, and Waymo.
- Developed a **Python-based email validation and automation tool** to test HTML/CSS templates for accessibility, structural compliance, and predefined brand rules.

- Built a **rule-engine system** that parsed email code, validated accessibility standards (ALT tags, ARIA, semantic structure), and generated pass/fail reports with improvement suggestions.
- Created a user interface where teams could paste email templates and receive automated compliance feedback.
- Collaborated cross-functionally with design, marketing, and QA teams to standardize email production workflows.
- **Technology**: Python, HTML, CSS, FreeMarker, Figma, Photoshop, Litmus, etc.
- **Key Responsibilities & Achievements**:
    - Reduced manual QA effort by 60% through automation and improved deployment efficiency for marketing campaigns.
    - Awarded Best Performer.
    - Recognized as Outstanding Team Player.

Front End Developer Intern, **GharPeShiksha** Delhi, India - Jun 2019 to Oct 2019

- Developed web pages, logos, and site layouts
- Maintained and enhanced website functionality.
- **Technology**: HTML, CSS, JavaScript, Java, Data Structures, Photoshop

SKILLS

Languages:
• JavaScript
• Python

Frontend:
• React
• Redux
• Three.js
• WebGL
• GSAP
• JavaScript (ES6+)
• HTML5
• CSS3
• Tailwind CSS
• Bootstrap

Backend:
• Django
• Django REST Framework
• FastAPI
• Node.js

Generative AI:
• OpenAI API
• Prompt Engineering
• LLM Integration
• FastAPI (AI APIs)

Database:
• MongoDB
• PostgreSQL
• MySQL

Tools / Platforms:
• VS Code
• Firebase
• Git
• GitHub
• Postman
• Docker (basic)

Other:
• REST APIs
• Authentication
• Performance Optimization
• Responsive Design
• UI Architecture
• Problem-solving
• Data structures
• Algorithms

EDUCATION

B.Tech in Information Technology
United College of Engineering & Research, Allahabad
2015 - 2019
Percentage: 66%
Intermediate (Physics, Chemistry, Math)
BLJ Inter College, Mirzapur
2013 - 2015
Percentage: 66%

PERSONAL PROJECTS

DoGPT – AI Chat App | https://dogpt-frontend.vercel.app/
React, Vite, Tailwind CSS, FastAPI (Python), Supabase (PostgreSQL + Google OAuth), Groq API (LLM streaming)

- Built a ChatGPT-like app with React, FastAPI, and Supabase.
- Implemented Google OAuth login and chat history storage.
- Implemented Google OAuth login and chat history storage.
- Reduced response latency using streaming APIs.
- Designed scalable chat architecture with user-based data isolation.

IMDb Clone (Movie Review Application | https://movie-review-app-react.vercel.app/
React, Vite, Node.js, Express.js, MongoDB, JavaScript, HTML, CSS

- Built a responsive movie review platform with React and Vite.
- Developed RESTful APIs using Express and integrated MongoDB for movie data.
- Implemented features like movie listing, filtering, search, and pagination.
- Integrated Axios with proper error handling and state management.
- Deployed frontend on Vercel and backend on Render with environment variable + CORS configuration.

CoderXYZ (Social Media Application) | https://adhyatma-ce6a3.web.app/
React, MongoDB, Express, Vite, Node.js, JavaScript, HTML, CSS

- Developed a platform for developers to post blogs, solutions, and discussions.
- Implemented authentication, real-time updates, scalable APIs, and a responsive frontend.

Weather App (Web Application) | https://weatherapp-408b5.firebaseapp.com/
React, Node.js, JavaScript, HTML, CSS

- Built a real-time weather application integrating the OpenWeatherMap API.
- Features include multi-day forecasts, search functionality, and geolocation.

CERTIFICATIONS

- **React** - Scaler Topics (2025) | **Link**
- **Python** - Kaggle (2023) | **Link**
- **Intro to Programming** - Kaggle (2023) | **Link**
- **Core Java** - Spectrum (2019) | **Link**
- **Cloud Computing** - HeadStar Technology (2020) | **Link**

ACHIEVEMENTS

- Promoted to Senior Associate Developer at Eccentric.
- Multiple performance recognitions.
- Best Performer & Outstanding Team Player Award at Trantor Software.
